Although this program is free, you'll need to be an Amazon Prime member to take advantage of it. If you're not a member you can sign up for a free trial of Amazon Prime or wait until they offer free subscriptions, which they do from time to time for special groups of people like moms or students.

Comer Kart Engines Fuel Mix

The most common oil ratio is 8 oz. per gallon, which is 16 parts fuel to 1 part oil also known as 16:1. If you mix 6 oz. per gallon you are now at 21 parts fuel and 1 part oil. The 16:1 ratio has less fuel in it than the 21:1 ratio. So when at 16:1 you may need a larger jet than when you run the 21:1 ratio.

For MAX PERFORMANCE - Rotax

The extra play allows ample space for the methanol-rich fuel/air mixture to wash past the rings and contaminate the oil. This is because, as noted early, the engine is burning a much higher ratio of fuel than a gasoline engine. There's simply more fuel to dilute the motor oil. Plus, at startup, the engine uses even more fuel than usual to ...
